Education in India

This correlates to the health levels of states, Kerala has average life expectancy at birth of 74.9 while Rajasthan's average life expectancy at birth

Education in India is primarily managed by the state-run public education system, which falls under the command of the government at three levels: central, state and local. Under various articles of the Indian Constitution and the Right of Children to Free and Compulsory Education Act, 2009, free and compulsory education is provided as a fundamental right to children aged 6 to 14. The approximate ratio of the total number of public schools to private schools in India is 10:3.

Education in India covers different levels and types of learning, such as early childhood education, primary education, secondary education, higher education, and vocational education. It varies significantly according to different factors, such as location (urban or rural), gender, caste, religion, language, and disability...

Secondary education covers two phases on the ISCED scale. Level 2 or lower secondary education is considered the second and final phase of basic education, and level 3 or upper secondary education is the stage before tertiary education. Every country aims to provide basic education, but the systems and terminology remain unique to them. Secondary education typically takes place after six years of primary education and is followed by higher education, vocational education or employment.
